

Theo Faber seeks truth in Alicia Brennan's murder case. The Silent Patient.

The story is about a lady, named Alicia Berenson, a famous painter, who was charged with the murder of her husband. Thing is that, since hasn't spoken a word since. Not even during her lawsuit. It's a journey of in-vestigations and inspections to get her to talk about why she murdered the man she married. The story goes in parallels, showing both sides of a coin.

Theo Faber, a criminal psychotherapist, seeks to unravel the mystery of Alicia Brennan's murder of her husband, navigating a twisting path and searching for the truth that may overwhelm him.

Black Hole - the greatest mystery of the Universe.

Black holes, a mysterious cosmic entity, form when dying stars collide, compressing a large mass into a small area. They appear black as light becomes trapped inside the hole. Albert Einstein and Karl Schwarzschild first suggested the existence of black holes in-

-general relativity, and John Wheeler coined the term in 1967. Astrophysical theories suggest that the black hole's mass is concentrated at a singularity, generating a strong gravitational field.

Internet - Connecting world with networks

The Internet is a worldwide network of computer networks that allows users to access information and communicate with others. It simplifies daily life, saves time, and enhances decision-making. However, it also poses risks like cyberbullying and attacks. It's essential to limit internet use and maintain a healthy lifestyle.
